far beyond ordinary

TENNIS

FAR BEYOND ORDINARY

To go far beyond ordinary begins with curiosity,
Toward a horizon of boundless blue and grounding green,
filled with endless possibilities.

The sky invites us to imagine beyond what we can see,
While the ground keeps us steady, guiding each decision
with purpose.

Progress here is rarely linear,
always accelerating and decelerating—
Where grand ideas meet meticulous exploration,
turning the unusual into the essential,
Transforming raw energy into pinnacle power.
It's crafted in milligrams and millimeters—
A balance of graphite, resin, and paint, each layer fine-tuned,
Every fiber placed to bring out the best in every swing.

Walking with a rhythm of quick trials,
insights gained, and constant refinement,
A quiet resolve to push forward when pausing would be easier.
The horizon doesn't take us to a single destination—
it sets us on a journey.

A journey where going far is about seeing
challenges as opportunities,
And believing the entrance to the next breakthrough
is always closer than we think.

far beyond ordinary

ISOMETRIC™

SIGNATURE YONEX TECHNOLOGY SINCE 1980

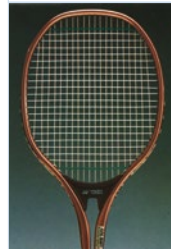

7% LARGER SWEET SPOT

Developed over 30 years ago, the ISOMETRIC™ design increases the sweet spot by 7%*. Compared to a conventional round frame, a square-shaped ISOMETRIC™ racket generates a larger sweet spot by optimizing the intersection of the main and cross strings. ISOMETRIC™ technology delivers greater control without sacrificing power.

1980

First isometric racket: R-1

*Tested by YONEX; ISOMETRIC™ is a trademark of Yonex Co., Ltd.

O.P.S.

Oval Pressed Shaft

First introduced in 1969 with the T-7000 - our first aluminum tennis racket - the Oval Pressed Shaft (OPS) is still incorporated into our most popular racket series today. The Oval Pressed Shaft is designed to give players more spin, control, and feel. The shaft flexes at impact, increasing dwell time and minimizing vibrations.

REVOLUTIONARY GRAPHITE

Staying true to our roots, our graphite is sourced and engineered in Japan, giving our research and development team the opportunity to utilize a wide range of materials that suits players of all levels.

2G-Namd

Flex Force

Aggressive, attacking spin for pinpoint control is achieved through a carbon nanotube structure that binds the graphite fibers together, which reduces energy loss. Due to its resilient properties, the material flexes and provides quick snapback.

Namd is technology developed by Nitta Co., Ltd. to uniformly disperse carbon nanotubes in carbon fiber composites.

2G-Namd

Speed

Designed to produce flex and power, 2G-Namd Speed is developed from high modulus graphite fibers bound with CNTs, resulting in a material that transfers energy into quick snapback.

Namd is technology developed by Nitta Co., Ltd. to uniformly disperse carbon nanotubes in carbon fiber composites.

MINOLON

MINOLON is made using threads spun by bagworms (minomushi in Japanese), featuring incredibly fine strands held together by an adhesive substance, enabling the formation of a net-like structure. The texture of material is soft and smooth to ensure a plush feel with every shot on the court. This innovative material combines both softness and strength, and the use of this material in products represents a groundbreaking technology, the first of its kind in the world.

*MINOLON is a material developed by Kowa Company. Ltd.

VDM

Vibration Dampening Mesh

First used in our snowboards to reduce vibrations at impact, Vibration Dampening Mesh (VDM) is now used in four of our racket series. VDM is a stretchy mesh material that is wrapped around the graphite within the grip to filter unwanted vibrations and improve touch and precision.

POWER

PLAY FULL POWER

The 8th-generation EZONE series delivers easy power and an improved, comfortable feel. Now available in two colors, this series is suitable for a wide range of players, from juniors and recreational players to the top players in the world.

graphite tech

PLUSH ZONE

The fusion of our graphite technology and advanced materials (2G-Namd™ Speed* x MINOLON) produces a one-of-a-kind plush feeling, while maximizing power.

*Please see page 11 for details

MINOLON

MINOLON is made using threads spun by bagworms (minomushi in Japanese), featuring incredibly fine strands held together by an adhesive substance, enabling the formation of a net-like structure. The texture of material is soft and smooth to ensure a plush feel with every shot on the court.

*MINOLON is a material developed by Kowa Company, Ltd.

new structure

ENERGIZING ISOMETRIC

By making precise improvements to the frame structure, EZONE allows players to experience explosive power while minimizing mis-hits.

Expanding the frame's top length:

Creates a bigger sweet spot

Widening the beam width at the top of the frame:

Enhances responsiveness and power.

vibration dampening mesh

ULTIMATE COMFORT

A stretchy mesh material is wrapped around the graphite within the grip to filter unwanted vibrations.

A male tennis player is captured in a dynamic, mid-swing pose on a tennis court. He is wearing a pink sleeveless athletic top and light blue shorts, both featuring a small logo. He is also wearing a pink wristband on his left wrist and white socks with black shoes. The background is a blurred blue wall, suggesting an outdoor court setting. The overall mood is energetic and focused.

SPIN

THE ART OF SPIN

The seventh generation VCORE is a masterpiece of technology and craft. The evolution of this iconic racquet combines undeniably precise spin and remarkable control, creating a true work of art.

New technology and structure combine with innovation to increase string snapback and movement, giving players access to the most spin in Yonex tennis history. Yes, it has even more RPMs than the previous model*, producing trajectories your opponent has never seen before.

*Compared to the 6th-generation VCORE.
Tested by Yonex.

VCORE VCORE

ISOMETRIC

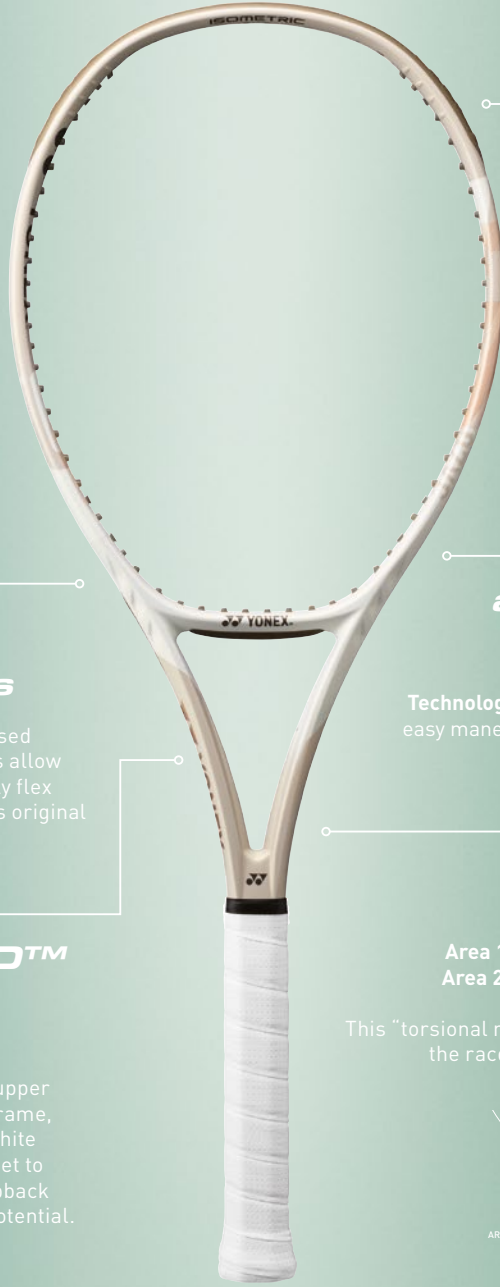

YONEX

YONEX

TOMMY PAUL (USA)

A wider frame at 2 o'clock & 10 o'clock position increases the ball contact area, which produces a higher launch angle.

aerodynamic technology

Aero Trench and Aero Fin Technology reduce air resistance for easy maneuverability and added spin.

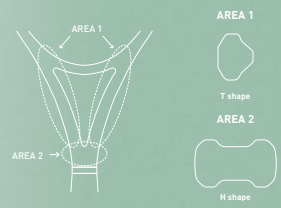

silicone oil infused grommets

New silicone oil infused within the grommets allow the racquet to quickly flex and snapback into its original position.

new throat design

Area 1 is T shaped cross section. **Area 2** is H shaped cross section.

This "torsional resistance" helps stabilize the racquet, reducing power loss.

2G-NAMD™ flex force

FOR AGGRESSIVE, ATTACKING SPIN
Incorporated in the upper throat to the lower frame, new Flex Force graphite allows for the racquet to quickly flex and snapback for maximum spin potential.

INVESTING IN THE FUTURE OF TENNIS

Vamos•J is a global camp that aims to promote tennis and develop high-performance young players through unique programs and life experiences.

Since 2011, Vamos•J has welcomed thousands of participants and expanded its presence all around the world to offer young players access to world-class trainers and coaches, professional clinics, and guidance on the mental game.

Vamos•J alumni include current ATP and WTA players like **Belinda Bencic** (SUI), **Jaume Munar** (ESP), and **Olga Danilovic** (SRB), who credit Vamos•J for impacting their junior careers before turning professional.

Through initiatives like Vamos•J, Yonex is proud to support aspiring professionals and help the dreams of young players come true.

€ 69,90 (RRP)

Properly introducing tennis to younger players is critical. These three progressive stages train players to develop a range of physical skills, as well as gradually learning the tactical and technical elements of tennis on smaller courts using slower balls.

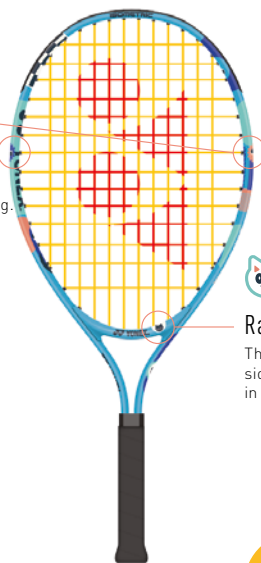

JUNIOR

PLAYFUL AND ENGAGING DESIGNS

Ready position tool

Visual aids on both sides of the frame assist in learning basic tennis positioning.

Racquet toss icon

The playful icon on both sides of the shaft helps in learning the rules.

SIF TECHNOLOGY

SILICONE OIL INFUSED FILAMENT

Silicone oil is infused deep into the polymers of the string, creating a smoother surface.

Silicone Oil Infused Filament (SIF) technology reduces the friction between strings, resulting in faster ball speed and improved spin.

POLYTOUR REV 120 / 125 / 130

Made in Japan

EMMA NAVARRO

MARCOS GIRON

- Intense bite and control from SIF technology* (Silicone Infused Filament)
- For baseliners with medium-to-fast swing speeds looking for a shaped string (8-sided) that grabs onto the ball for the ultimate spin experience.

REXIS

FUSION OF RESIN FILAMENT (FRF)

FRF eliminates small gaps between fibers, resulting in more power at impact

PLASMA BONDING:

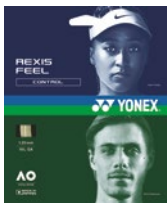

Resin is bonded to nylon filaments by plasma on a molecular level increasing durability

FORTIMO™:

A highly elastic polyurethane allows strings to be more flexible and repulsive, resulting in improved ball-pocketing and increased ball speed. FORTIMO™ is bonded within the filaments through the FRF production process, resulting in the comfortable, powerful, and durable REXIS series.

FORTIMO™ is developed by Mitsui Chemical, Inc.

REXIS 125 / 130

- Improved power, repulsion, and durability with the innovative FRF production process.
- For players of all swing speeds.

THE YONEX STRINGING TEAM HAS BEEN SERVING AS THE OFFICIAL STRINGING TEAM AT THE AUSTRALIAN OPEN FOR NINE YEARS, ACHIEVING THE HIGHEST NUMBER OF TOTAL RESTRINGS IN 2022.

YONEX STRINGING TEAM

CRAFTING EVERY SWEET SPOT

From your local shop to the center stage at Rod Laver Arena, the Yonex Stringing Team supports tennis players worldwide, from the first clamp to the finishing knot and beyond. This global network of over 1,500 stringers consists of experts dedicated to crafting the perfect sweet spot for every player.

Each team member ensures the precision of the stringing service, balancing racquet and string knowledge, stringing techniques, environmental

factors, and most importantly, the human touch. Equipped with cutting-edge Yonex stringing machines, the team offers consistent service in line with our stringing standards.

The Yonex Stringing Team is the official stringing team of the Australian Open and other major tournaments around the world, such as the Shanghai Masters and the Toray Pan Pacific Open Tennis. We support players' performance with reliable stringing techniques.

STRINGING MACHINES

PRECISION 9.0

Made in Japan

Premium electronic tennis, badminton, and soft tennis stringing machine

| | |
|----------------------|--|
| SIZE | Approx. 1,020 mm (W) x 660 mm (D) x 1,070 mm - 1,370 mm (H) |
| WEIGHT | Approx. 73 kg / 161 lbs |
| PULL SPEED | 9 speeds |
| TENSION RANGE | 10-88 lbs (0.5 increments); 4.4-39.4 kg (0.2 increments + 5) |
| PRE-STRETCH | 1-20% (1% increments) |
| ITEM CODE | ACPRE9 |

€ 13.400,00 (RRP)

FEATURES

USER-FRIENDLY: STRINGING ENVIRONMENT

A control panel with angle, brightness, and sound adjustments, along with a USB charging port, create a comfortable stringing environment.

EFFICIENT: MOUNTING SYSTEM

Lower racket posts and a compact turntable combine to allow for smoother stringing, while improved gripping on the clamps results in less damage to the string.

CUSTOMIZABLE MAIN POST

Easily adjust the height on the main post with one click through the electric elevation system.

PRECISE: AUTOMATIC LOCK FUNCTION

An accurate and quick lock function improves stringing efficiency and speed.

PRECISION 8.0

Electronic tennis, badminton, and soft tennis stringing machine

| | |
|----------------------|---|
| SIZE | Approx. 1,070 mm (W) x 640 mm (D) x 1,110-1,360 mm (H) |
| WEIGHT | Approx. 54 kg / 119 lbs |
| PULL SPEED | 9 speeds |
| TENSION RANGE | 10-88 lbs (0.5 increments); 4.4-39.5 kg (0.2 increments) |
| PRE-STRETCH | 1-20 (1% increments) |
| ITEM CODE | ACPRE8 |

€ 10.800,00 (RRP)

Made in Japan

FEATURES

PRECISE: CLAMP

Precision 8.0 features an upgraded clamp, with a thinner, shorter, and more ergonomic design. The new clamp design prevents clamps from overlapping and allows stringers to clamp closer to the racquet frame when tensioning.

EFFICIENT: CLAMP BASE

Designed with a larger button for easy unlocking, improving stringing speed and efficiency.

ADJUSTMENT: MAIN POST

Height adjustment range: 250mm.

The main post can be manually adjusted to allow for smooth height adjustment.

STABILITY: MACHINE BASE

The stability got improved by the enlarged base to expand the installation area and the low center of gravity.

PRECISION 5.2

Electronic tennis, badminton, and soft tennis stringing machine

| | |
|----------------------|---|
| SIZE | Approx. 1,169 mm (W) x 685 mm (D) x 1,093-1,273 mm (H) |
| WEIGHT | Approx. 74 kg / 163 lbs |
| PULL SPEED | 3 speeds |
| TENSION RANGE | 11-82 lbs (0.5 increments); 5-37 kg (0.2 increments) |
| PRE-STRETCH | 0.5, 10, 15, 20 % |
| ITEM CODE | ACPRE524 |

€ 7.700,00 (RRP)

FEATURES

CLAMP

Utilizing aluminum for a lightweight design. Improved usability ensures reduced fatigue during extended stringing sessions. Refinements to the interior of the clamp jaws ensure secure gripping, even with high tension or soft string, while minimizing damage. Incorporating an anti-loosening feature prevents the dial from loosening during operation.

CLAMP BASE & RAIL

Smoother movement is achieved through bearing installation, enhancing operability. Improved noise reduction through changes in material combinations.

CONTROL PANEL

Added features include pull count display and volume adjustment functions (9 levels). The button layout and LED display have been updated to achieve advanced design and improved work efficiency.

TENSION UNIT

Redesigned to be usable without a stand (on a tabletop). The tool tray now features improved weight capacity and reduced shaking, enabling the storage of numerous tools.

SWING WEIGHT MACHINE

PRECISION SCAN

Electronic tennis, badminton, and soft tennis weight and balance machine

| | |
|------------------|--|
| SIZE | Approx. 700 mm (W) x 453 mm (D) x 283 mm (H) |
| WEIGHT | Approx. 15 kg / 33 lbs |
| ITEM CODE | ACPRES |

€ 3.000,00 (RRP)

FEATURES

Precisely scan the total weight and balance of rackets by placing the racket on the machine with a touch of a button.

QUICK SCAN: COMPUTER UNIT

The computer unit will provide the total weight, balance, swing weight, and performance swing weight.

Performance swing weight is a Yonex-exclusive measurement - more accurate than normal swing weight - and is calculated by using the values of the total weight, racket balance, and swing weight.

ACCURATE: COVER, BAR, RING

The acrylic cover protects the machine's three main sensors while not in use.

A calibration bar and calibration ring is provide to ensure the machine gives accurate swing weight measurements.

GRAPHITE
SHEET

ACCEL BOOSTER

Enhance acceleration and speed up your game

Quicker turnaround. Unstoppable court coverage. More time to plan your shots. AD ACCEL boosts your game like never before with innovative technology: Carbon sheets enhance strength and layered sheets of ACCEL BOOSTER speed in different areas of the foot.

ACCEL BOOSTER + TOE SPRING STRUCTURE

Enhanced pivots and speed

The upward-curved front and ACCEL BOOSTER technology create a strong kickstart for your next move. Together, they enhance movement speed by 2%.

*Tested by Yonex.

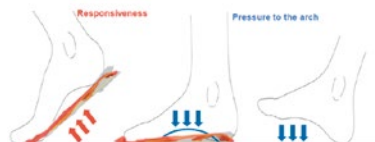

WCURVED + EXTENDED TPU SHANK

Quicker turnarounds

The central section of the ACCEL BOOSTER provides strength during outer-turning force and flexibility to accommodate inner-turning pressure. This design enables players to slide naturally for quicker turnarounds.

*Tested by Yonex.

TPU SHANK ARCH

Steady footwork

The layered section of the ACCEL BOOSTER provides support to the foot's arch, absorbing foot stress and returning energy to players with every step. Maintain your footwork without compromising performance.

TENNIS SHOES

SONICAGE 3 COMFORT

FLEXQUIP DURABLE SKIN

Evenly distributes natural pressure from on-court movement, while providing extra durability during aggressive movements on court.

SEAMLESS TONGUE

The tongue is sewed together with the inner lining for a smooth, seamless fit for maximum comfort.

TPU SHANK

Extended into the forefoot for faster, more stable footwork.

FUSIONREV 5 PERFORMANCE FIT

UPDATED FUSION WING

Placed on the forefoot, the updated inner and outer wing are designed for active support and provide stability; unlocking quick lateral footwork.

DURABLE SKIN AND msLITE X

Light and soft msLITE X used in midsole for bouncy support from below. The Durable Skin supports the foot from above.

NEW TPU SHANK

The wider shape of the new TPU shank enhances its stability and allows for natural movement during agile footwork. Located between the midsole and outsole for optimal support.

OUR RANGE OF

accessories

“Prepare for performance.”

The connection between your hand and the racket is often overlooked but can make the biggest difference.

Yonex designs a range of overgrips to fit every player's preference. From Super Grip - Yonex's most popular overgrip that has been sold enough to wrap around the world five times - to Dry Grip, which wicks away moisture and provides a dry feeling even in humid conditions, every Yonex overgrip is designed to make the connection between your hand and your racket one you can trust.

ACCESSORIES / OVER GRIPS

SUPER GRAP

Tacky feel

Since its launch in 1987, the Super Grap has become Yonex's best-selling overgrip, having sold enough grips to wrap five times around the earth.
